Re: Marcus Hook Terminal

Monthly Progress Report – October 2022

Area of Interest 7 Marcus Hook, PA

Dear Mr. Bilash:

This monthly progress report is being submitted on behalf of the Evergreen Resource Management Operations (Evergreen) for Area of Interest (AOI) 7 at the Marcus Hook facility. Note that on March 1, 2022, Sunoco Partners Marketing & Terminals L.P. changed its name to Energy Transfer Marketing & Terminals L.P. (Energy Transfer) and the facility changed its name from Marcus Hook Industrial Complex (MHIC) to Marcus Hook Terminal (MHT). On December 9, 2021, a Revised Interim Measures (IM) Workplan was submitted to the United States Environmental Protection Agency (USEPA) to address arsenic in the subsurface at AOI 7. The IM Workplan was approved by the USEPA on February 15, 2022. The discussion below provides an update on IM pre-design investigation (PDI) activities and Bench Scale Treatability Study activities.

Activities completed this reporting period

Bench Scale Treatability Study activities occurred in the treatability lab at Terra Systems, Inc. (Terra Systems) in Claymont, Delaware. Specifically, rebound test activities were completed in accordance with the Revised IM Workplan. Note that the results of the treatability testing will be submitted in a future progress report once the Bench Scale Treatability Study is completed.

Activities planned for the next reporting period

The activities planned for the next reporting period (November 2022), as described in the Revised IM Workplan:

Continuing rebound test activities in accordance with the Revised IM Workplan.

Deviation from approved activities this reporting period

There were no deviations from the approved activities for this reporting period.

Deviation from approved schedule

As requested by the USEPA during the August 15, 2022 meeting, Sanborn Head prepared a technical memorandum summarizing the Porewater Sampling Plan for additional porewater sampling at select locations that was provided in an attachment to the September 2022 Monthly Progress Report. The additional porewater sampling was planned for October 24, 2022 through October 28, 2022 by Sanborn, Head & Associates with their subcontractor Normandeau Associates (Normandeau).

On October 13, 2022, USEPA provided comments to Evergreen on the proposed Porewater Sampling Plan. On October 26, 2022, USEPA, Evergreen, and Sanborn Head met to discuss the USEPA comments and the overall scope of work for the Porewater Sampling Plan. Based on the outcomes of that discussion, the additional porewater sampling event will be postponed and a response to USEPA comments will be provided in a follow-up call with USEPA, Evergreen, and Sanborn Head to solidify the scope of work for the additional porewater sampling activities.

The schedule for the major milestones is provided below and the detailed schedule is included in Attachment A. The schedule below reflects the tentative timeframe that Normandeau has availability to complete additional porewater sampling activities. An exact timeline of porewater sampling activities will be provided once the scope of work has been finalized.

Task	Schedule
PDI Activities	3/2022 – 5/2022
Bench Scale Treatability Testing	5/2022 – 10/2022
Additional Porewater Sampling	12/2022
Pilot Testing	On pause
IM Performance Monitoring	On pause

Very truly yours,

SANBORN, HEAD & ASSOCIATES, INC.

Colleen Costello, PG Senior Vice President

Senior vice President
